

DUNE Dark Template Lab

Open Sans variant

Manuel Arroyave

April 21, 2026

Layout First

Use more than one slide shape, or the whole deck feels flat

Editorial Opening, Not Memo Opening

OPEN WITH A CLAIM

If the opening slide feels like a memo, the room will treat the whole deck like one.

Current build: Open Sans

Better opening mix

one strong claim

one visual contrast

one consequence for the audience

Use More Than One Slide Language

Hero

One idea. High contrast. Slow the room down.

Cards

Fast scanning for comparisons and grouped points.

Figure-led

Let the image own the slide. Text only frames it.

Figure-Led Layouts Feel Less Generic

Drop a real diagram here

A system sketch, waveform plot, or
detector view should own the slide.

Annotate sparingly

what changed

what matters

where to look first

SECTION

Font Lab

Try several voices, then keep the one that still reads instantly

Font Voices In This Lab

Open Sans

Safest option for dense technical body text.

Dosis

More editorial. Better for titles than dense paragraphs.

KoHo

Most distinctive. Best with stronger diagrams and fewer words.

Reading rule

Open Sans is safest. Dosis and KoHo are stronger voices and need more restraint.

Local Assets, Not Machine-Specific Luck

Bundled into the lab

`fonts/` carries the tested Open Sans, Dosis, and KoHo files used by the presets.

Dark-theme branding

`logos/DUNElogo_white.png` and `logos/FNAL-Logo-NAL-Blue.png` are used directly in the theme.

Dark Theme Rules

Contrast

Keep secondary text muted so emphasis stays visible.

Space

Cards need more room on dark backgrounds.

Accent

Use orange and cyan as cues, not wallpaper.

Rule of thumb

If more than one accent shouts, the slide stops feeling deliberate.

Workflow Example

A process slide can replace a table when the message is sequence, not inventory

Pipeline Slide Without a Table

Signal

Start from the one event the audience should picture.

Descriptor

Show what the board or algorithm extracts locally.

Aggregation

Show where multi-channel or multi-board context begins.

Decision

End on the detector or physics action.

What This Lab Is For

Use this lab when the standard collaboration deck feels too flat for the story.

Clarity first. Style only where it improves hierarchy.

Next step for real talks

Lift the macros, the font preset you want, and only the slide types that fit the story.
