Presentation title

State the audience outcome in one clear sentence

Presentation author

Meeting or event – November 5, 2026

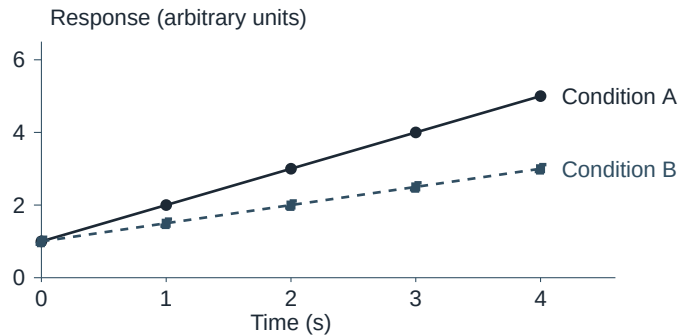
THE RESULT

Make one claim the evidence supports.

Say what changed, why it matters, and what remains uncertain.

Name the person who acts next and the result they need to produce.

Compare conditions on the same scale



Illustrative data: two constructed series demonstrate shared axes, direct labels, and distinct marks. Replace with sourced measurements.

Label each relationship where it appears

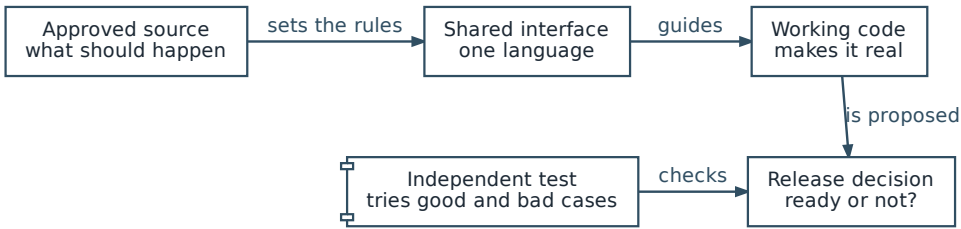


Diagram. Illustrative release process: source requirements guide the code; an independent test informs the release decision. This is not an installed system or an agreed assignment of responsibility.

Keep the evidence and its limits together

What the evidence supports

Give the observation, units, source, and conditions needed to read it.

What remains open

State the uncertainty and the check that could change the conclusion.

Next action

Name the person, the action, and the result that will close the question.
